

STATE PROJECTS: REQUIREMENTS

1. Your child has a calendar of the required projects. There are 20 small projects as opposed to a few large ones. Although many of the projects are quick and fun the students will learn a great deal about their state through their research.
2. The students will work on one of the 20 projects, and their state map at school. The rest of the projects should be completed at home. Your child has a calendar in his/her folder that can be used to mark off the projects as they are completed. Please check with them often to see how they are doing, so they don't leave everything off to the last minute. **ALL PROJECTS ARE DUE APRIL 12th.**
3. Many of the projects are small. We would like each child to have a display for his or her state. Using a piece of oaktag, or two taped together like a book, students should attach their small projects to the display. For example, the state poem, the greeting card, the math problem, the new state flag, etc. could all be attached to the oak tag. Some bigger items like the float will be displayed separately.
4. I've included a copy of the calendar on the reverse side of this page for your convenience. Your child also has a copy in his/her folder. Please sign and return this paper, so that we'll be sure that everyone is aware of what we're doing. Then this paper will be returned to you.
